Site Browser and Viewing Requirements

Contents

- [Supported browsers](#)
- [Browsers not supported](#)
- [Additional browser considerations](#)
- [Viewing requirements](#)

Supported browsers:

The Delphion website is best viewed on a PC using one of the following browsers:

- Internet Explorer: Versions 5.x through 7.x
- Netscape Navigator/Communicator: Versions 6.x through 7.x
- Firefox: Versions 1.x

Note: Delphion's Citation Link feature is not compatible with Netscape 6.x and 7.x at this time.

Browsers not supported:

The site has not been tested in a Macintosh environment or using the following browsers:

- AOL
- Opera, WebTV, or any UNIX-based browsers

Additional browser considerations:

In addition, it is recommended that the following features of your browser are enabled. Delphion takes advantage of these features to make your site experience more productive.

- Cookies
- Javascript (For navigation and user interaction)
- SSL (For security; See our [Privacy Policy](#) for more information)
- Java (For the View Cluster Map screen)

If you are not sure which version of Internet Explorer or Netscape Communicator/Navigator you are using, follow these steps to find out:

- Click on "Help" in your browser's menu
- Select "About Internet Explorer" or "About Communicator/Navigator" from the drop-down
- A window will be presented with your browser's version

Viewing requirements:

PDF documents require Adobe Acrobat Reader software for viewing. All versions of the reader through 7.x are currently supported.

TIFF documents are viewable through the Kodak Imaging for Windows software or other graphics software that normally comes installed on Windows systems.
